

Environmental Policy

Vision

It is our responsibility to reduce our environmental impact.

We Believe

- Reducing our impact on the environment is the right thing to do and makes good business sense.
- A constructive partnership with the public, industry and regulatory bodies will help reduce our environmental impact.
- The future of our industry depends on us reducing our environmental footprint and becoming more efficient.
- Our people value a business that is both an innovator and champion for the environment.

We will achieve this by

- Ensuring that we are always compliant with all legal and regulatory requirements to operate.
- Measuring and recording environmental inputs and outputs and tracking performance.
- Regularly reviewing and reporting on our environmental performance.
- Maintaining an environmental management system which includes identification and evaluation of the environmental risks associated with our business activities.
- Setting objectives and targets on a risk-based approach that prioritises controls and programmes for managing critical environmental risks.
- Continuous improvement of environmental performance and risk management.
- Supporting training programmes that build environmental knowledge and improve environmental work practices.
